Interregional transfer provides resilience

But estimates of transfer
capability are hard to come by

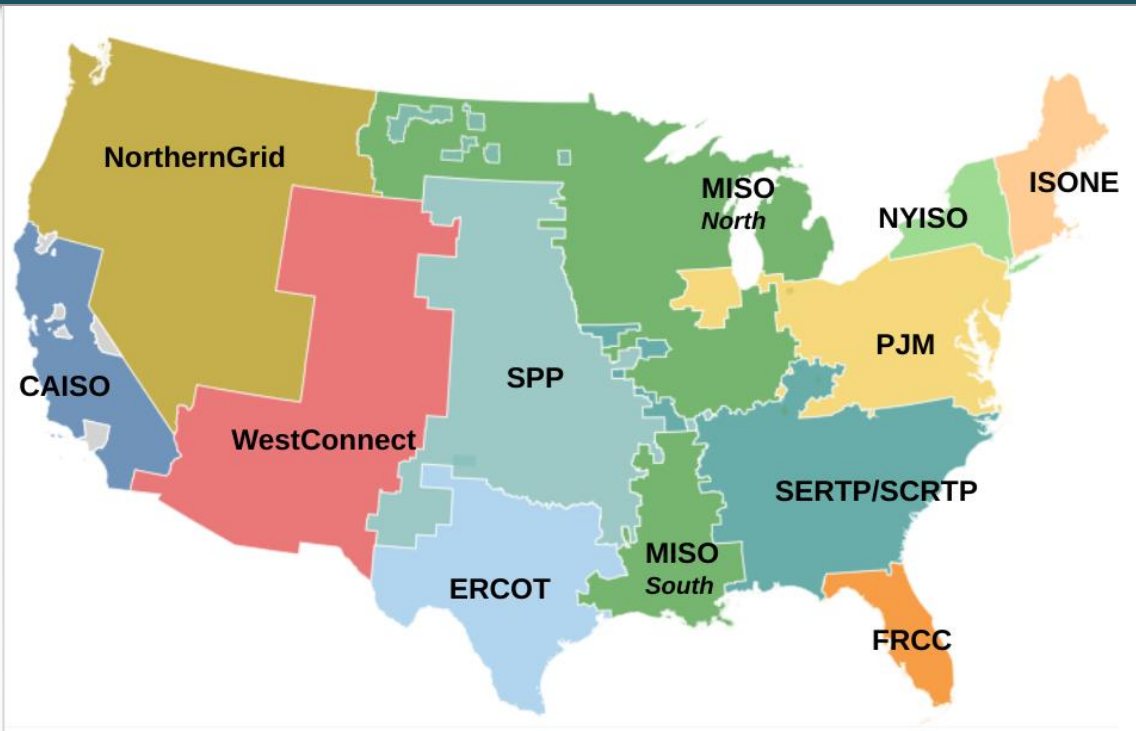

Defining regions is a challenge

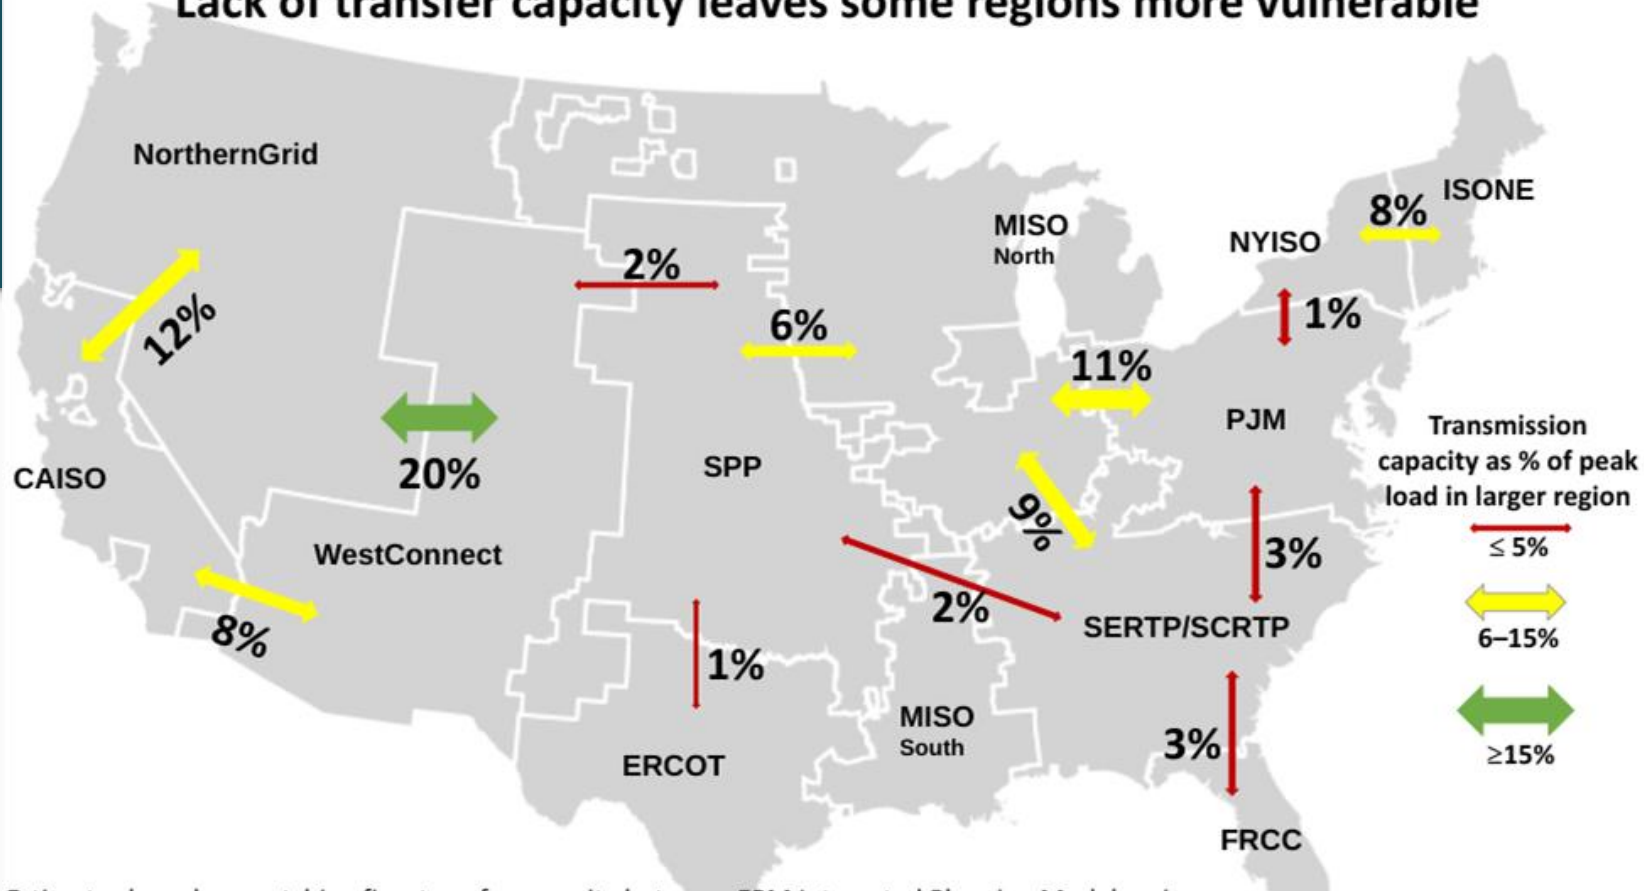

Mapping regions is a challenge

Mapping regions is a challenge

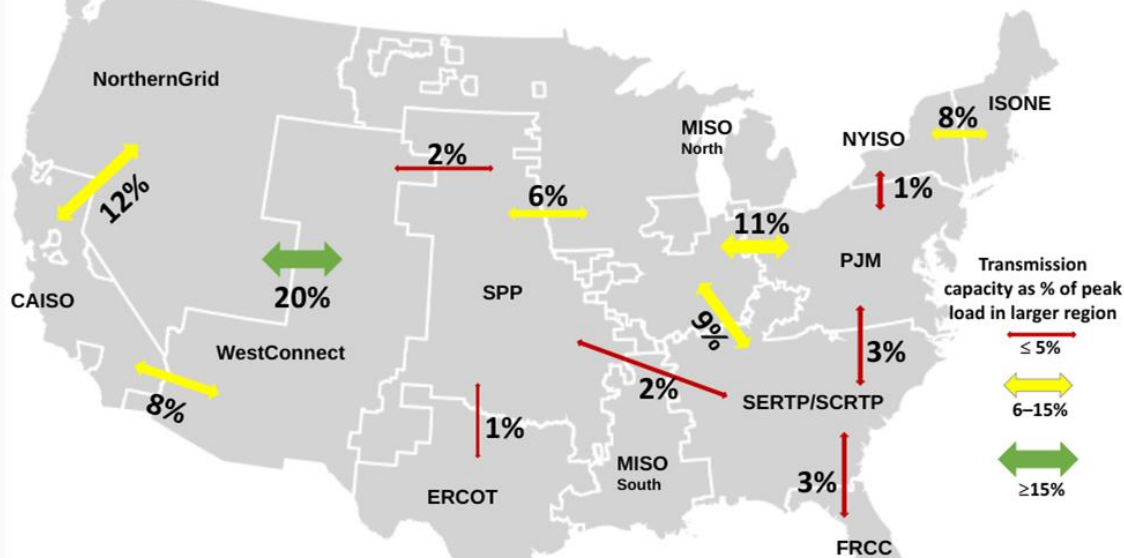

Lack of transfer capacity leaves some regions more vulnerable

Estimates based on matching firm transfer capacity between EPM Integrated Planning Model regions to FERC Order 1000 regions. Some regions are combined due to lack of available data. BANC and LAWP excluded. Analysis by Carbon Impact Consulting.

Setting policy is a challenge

Lack of transfer capacity leaves some regions more vulnerable

Estimates based on matching firm transfer capacity between EPM Integrated Planning Model regions to FERC Order 1000 regions. Some regions are combined due to lack of available data. BANC and LAWP excluded. Analysis by Carbon Impact Consulting.

Setting policy is a challenge

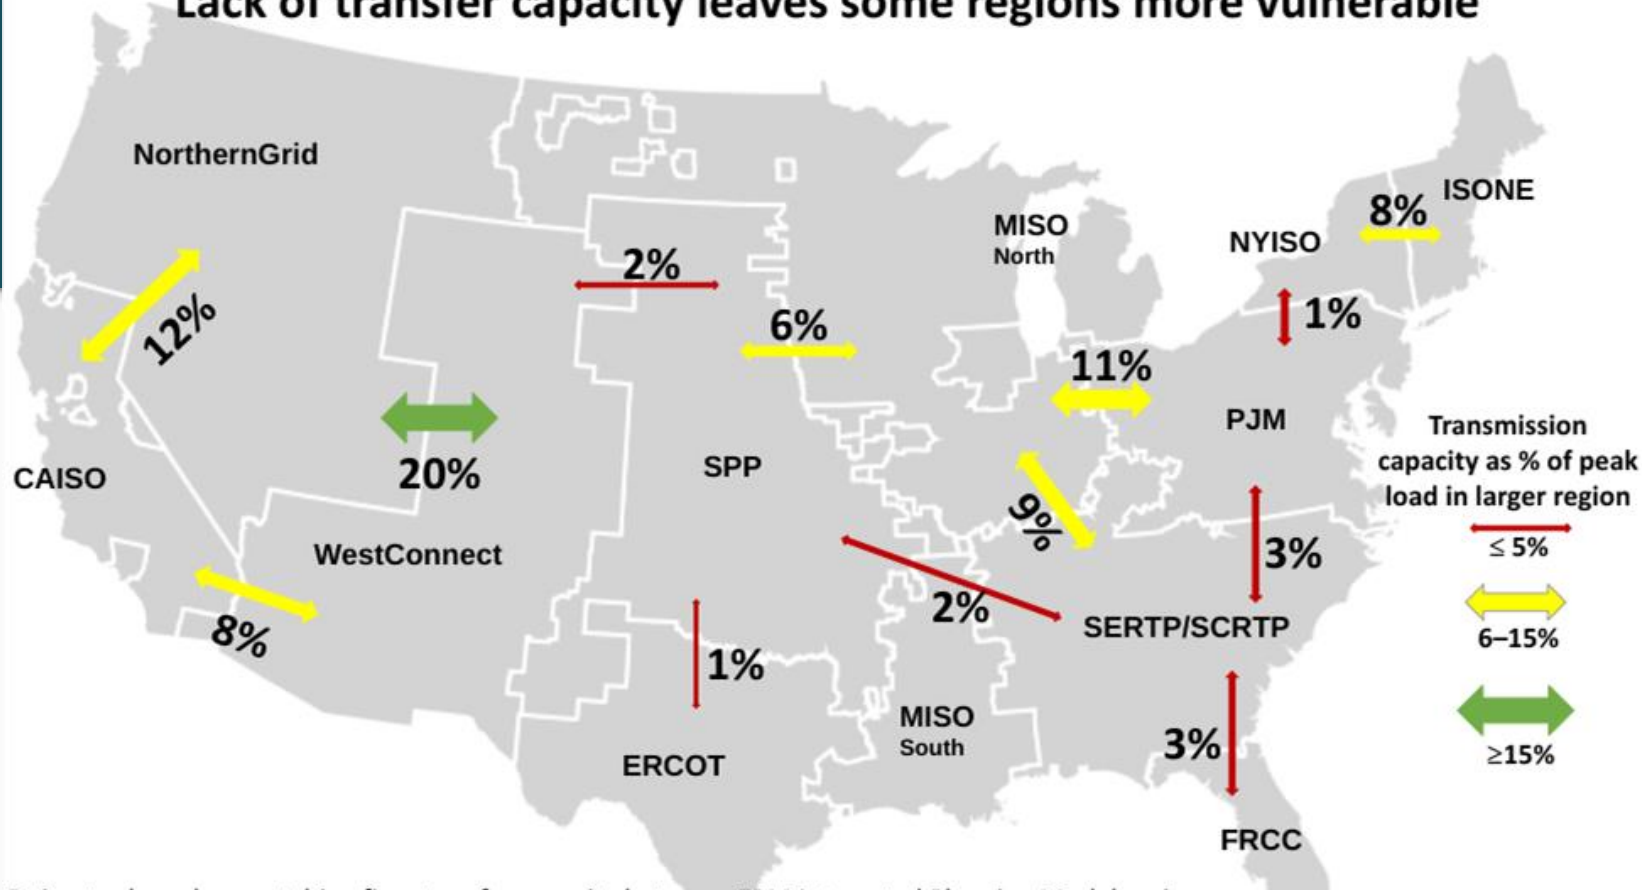

European standard

Resource adequacy standards

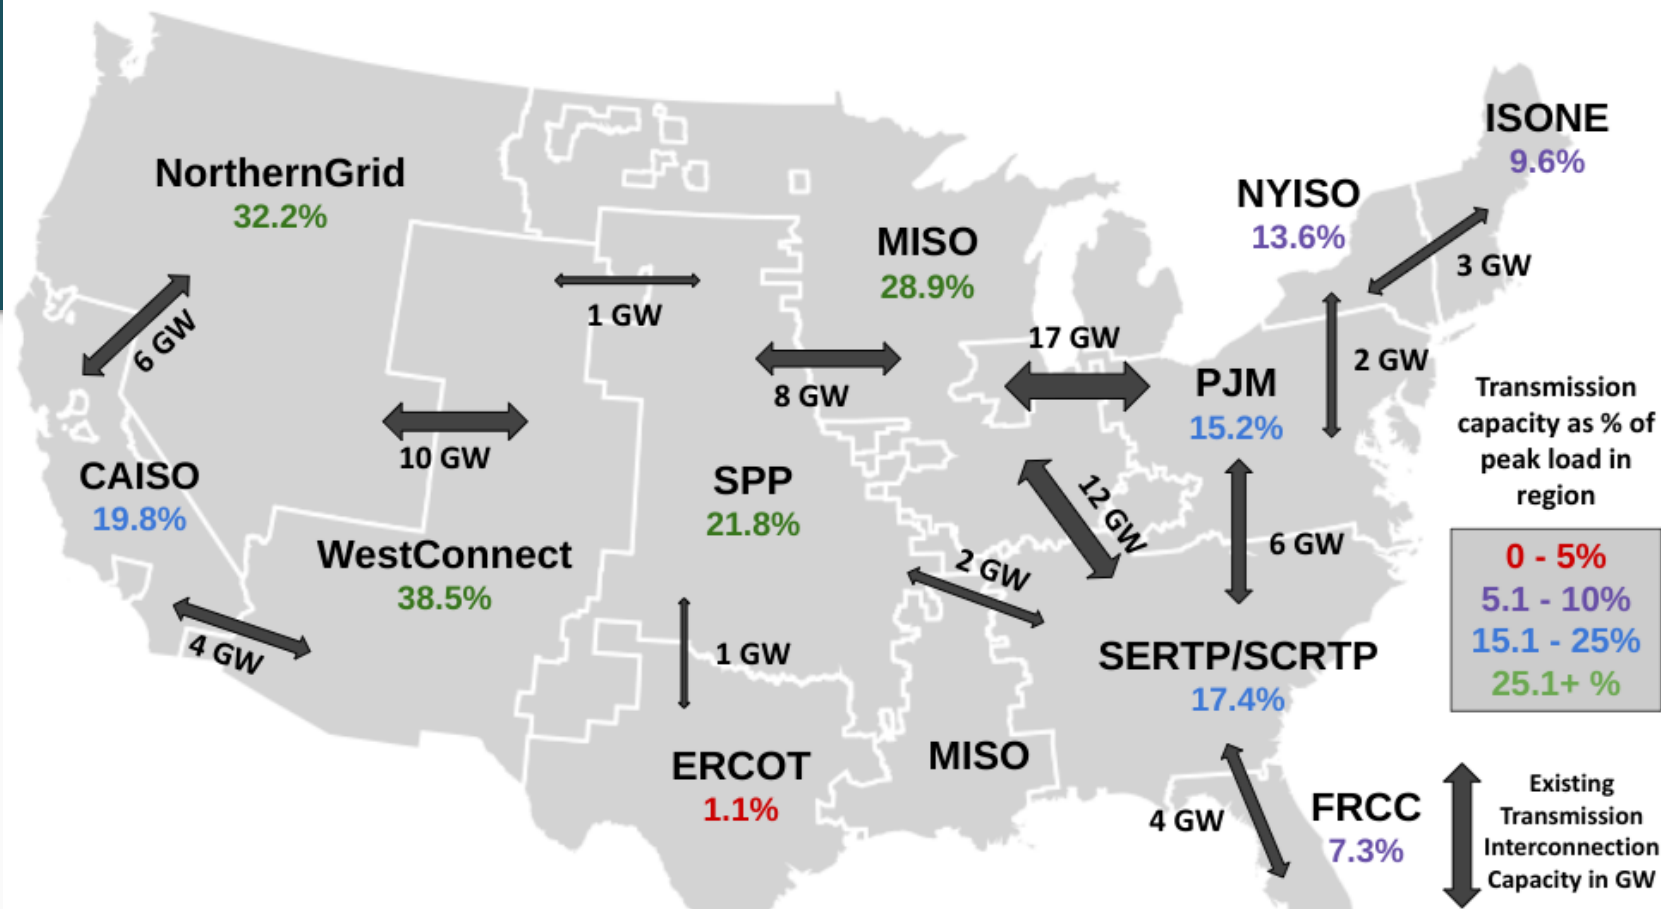

Timelines for updating

Cost allocation

Lack of transfer capacity leaves some regions more vulnerable
